Shares are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Total Returns are calculated using the daily 4:00 pm ET net asset value (NAV). The price used to calculate the market price returns (“MP”) is the mean between the day's last bid and ask prices on the fund's primary exchange. The market price returns do not represent returns an investor would receive if shares were traded at other times.

Index performance is for illustrative purposes only and does not represent actual Fund performance. One cannot invest directly in an index. Performance data for the Index assumes reinvestment of dividends and is net of the management fees for the Index's components, as applicable, but it does not reflect management fees, transaction costs or other expenses that you would pay if you invested in the Fund directly. No representation is being made that any investment will achieve performance similar to that shown.

[†] Oceana, founded in 2001, is the largest international advocacy organization focused solely on ocean conservation. Their offices around the world work together to win strategic, directed campaigns that achieve measurable outcomes intended to make our oceans more biodiverse and abundant. Since its founding, Oceana has won more than 225 victories and protected nearly 4 million square miles of ocean.

New York Life Investments and IndexIQ contribute to Oceana's charitable initiatives based on a portion of OCEN's management fee. Through our ongoing donations, New York Life Investments and IndexIQ are proud to help Oceana further its mission of restoring fisheries by stopping overfishing, preventing bycatch, protecting habitat, and reducing pollution from single-use plastics.

Before considering an investment in the Fund, you should understand that you could lose money.

Foreign securities can be subject to greater risks than U.S. investments, including currency fluctuations, less liquid trading markets, greater price volatility, political and economic instability, less publicly available information, and changes in tax or currency laws or monetary policy. These risks are likely to be greater for emerging markets than in developed markets.

Large-Capitalization Companies Risk: Large-capitalization companies may be less able than smaller capitalization companies to adapt to changing market conditions. Large-capitalization companies may be more mature and subject to more limited growth potential compared with smaller capitalization companies. During different market cycles, the performance of large-capitalization companies has trailed the overall performance of the broader securities markets.

New Fund Risk: The Fund is a new fund. As a new fund, there can be no assurance that it will grow to or maintain an economically viable size, in which case it could ultimately liquidate.

Small and mid-cap stocks are often more volatile than large-cap stocks. Smaller companies generally face higher risks due to their limited product lines, markets and financial markets.

ESG Investing Style Risk Impact investing and/or Environmental, Social and Governance (ESG) managers may take into consideration factors beyond traditional financial information to select securities, which could result in relative investment performance deviating from other strategies or broad market benchmarks, depending on whether such sectors or investments are in or out of favor in the market. Further, certain ESG strategies may limit exposures found in similar strategies or broad market benchmarks, which could also result in relative investment performance deviating. There is no assurance that employing ESG strategies will result in more favorable investment performance.

Clean Oceans Investing Style: The returns on a portfolio of securities that excludes companies that have not adopted practices and policies that help to protect and/or achieve a cleaner ocean through reduced pollution and increased resource efficiency may trail the returns on a portfolio of securities that includes companies that have not adopted these practices and policies. Investing only in a portfolio of securities of companies that help to protect and/or achieve a cleaner ocean through reduced pollution and increased resource efficiency may affect the Fund's exposure to certain types of investments and may adversely impact the Fund's performance depending on whether such investments are in or out of favor in the market.

None of the payments made by NYLIM and IndexIQ to Oceana is in exchange for services provided by Oceana. NYLIM and IndexIQ's contribution to Oceana is calculated on an annualized basis to be the lower of: (i) 0.045% of the Fund's average daily net managed assets (the average daily value of the total assets of the Fund, less all accrued liabilities of the Fund and less any management fees waived by the Fund's adviser or sub-adviser); or (ii) ten percent of the Fund's net annual management fee taking into account all applicable fee waivers and expense reimbursements. NYLIM and IndexIQ will make annual minimum contributions of \$50,000 per year through the fifth anniversary of the listing of the ETF on a national securities exchange."

The IQ Candriam Clean Oceans Index incorporates thematic selection criteria designed to provide exposure to equity securities of companies that help to protect and/or achieve a cleaner ocean through reduced pollution and increased resource efficiency. Companies selected for inclusion in the Index offer products and services that target solutions which contribute to the protection or achievement of cleaner oceans, are users of such products or services, or are engaged in activities with ocean-related sustainability objectives. The Underlying Index was developed by IndexIQ LLC with Candriam Belgium S.A. acting as index consultant.

The MSCI World Index (Net) is a free float-adjusted market capitalization-weighted index that is designed to measure the equity market performance of developed markets.

††A satellite position is a specialist investment which seeks to achieve additional alpha outside of a portfolio's core holdings, which typically seek to achieve market-rate returns. ESG means Environmental, Social and Governance.
