Introduction

This document sets forth the methodology for the NYLI Research and Development Index series (each a “NYLI Index” and collectively the “Indexes”). The Indexes include the following:

- NYLI U.S. Large Cap R&D Leaders Index (“Large Cap”)
- NYLI Global Equity R&D Leaders Index (“Global”)

Capitalized terms are defined herein. For additional information, refer to the NYLI Events Guide.

Index Objective

The NYLI Research and Development Index series seek to provide exposure to highly innovative companies by investing in the equities with the highest R&D spending in the past one year in two universes: U.S. Large-cap and Global. Companies with high R&D spending are investing for future growth in their business and may enjoy strong long-term competitive positioning.

Eligibility Requirements

Index Universe

All Index components are selected from constituents of the following indices:

<u>NYLI Index</u>	<u>Base Universe index (“Base Universes”)¹</u>
Large Cap	Russell 1000 [®] Index
Global	FTSE All World [®] Index

Securities that trade on exchanges in the following countries will be excluded from the Base Universes and will be ineligible for inclusion in the R&D Indexes:

- China companies that trade on one of the following exchanges:
 - Shanghai
 - Shanghai Connect
 - Shenzhen
 - Shenzhen Connect
- Bahrain

¹ For more information on the methodology for the Russell indices, visit https://research.ftserussell.com/products/downloads/Russell-US-indexes.pdf?_ga=2.236685185.1229005197.1636559148-1603133784.1636559148.

For more information on the FTSE Global Equity Index Series, visit https://research.ftserussell.com/products/downloads/FTSE_Global_Equity_Index_Series_Guide_to_Calc.pdf?_ga=2.237740800.1229005197.1636559148-1603133784.1636559148.

- Egypt
- India
- Kuwait
- Pakistan
- Qatar
- Romania
- Saudi Arabia
- United Arab Emirates

To align with the rebalance and reconstitution of the Base Universes, their pro-forma versions are used where available.

Selection Criteria

The components of the Indexes are selected from their respective Base Universes based upon the most recently reported 1 year US Dollar R&D spending for each constituent.

Index Construction

As of the Reconstitution, the Indexes will select the top components with the highest R&D.

NYLI Index Number of constituents selected

Large Cap	100
Global	200

Research & Development Data

The R&D data are pulled from a FactSet standardized table which aims to reconcile companies' reporting differences for a better cross-sectional comparison. At each rebalance date, the latest four quarterly research and development data, the latest semi-annual or fiscal year end research and development data would be pulled out across the Base Universes. For each security, the research and development number used for weighting is calculated by summing up the latest four quarterly research and development data. If any of the quarterly research and development data shows non valid or zero, the latest semi-annual or fiscal year end research and development data will be used.

Weighting

Index component weights are derived from their reported R&D. The pro-rata percentage of each company's R&D relative to the sum of the R&D of the selected securities represents the weight of the component with higher R&D spending companies receiving higher weights within the index.

Concentration Limitations

Concentration limits are set as both absolute levels and relative to the growth version of the Base Universes ("Growth Index").

<u>Base Universes</u>	<u>Growth Index</u>
Russell 1000 [®] Index	Russell 1000 [®] Growth Index
FTSE All World [®] Index	FTSE All World [®] Growth Index

At the time of the Reconstitution, no single component of the Index may have a weighting greater than the maximum of (5% of the Index or the weight of the component's issuer in the Growth Index + 2%) ("Component Weight Cap"). To the extent one or more components would exceed this limitation at the time of the Reconstitution, the Component Weight Cap is applied, and the excess weight is allocated proportionately among the other Index components.

Additionally, at the time of the Reconstitution, no sector weight in the Index may have a weighting greater than the maximum of (30% of the Index or the weight of the sector in the Growth Index + 5%) ("Sector Weight Cap"). To the extent one or more sectors would exceed this limitation at the time of the Reconstitution, the Weight Sector Cap is applied, and the excess weight is allocated proportionately among the other Index components.

In addition, at the time of the Reconstitution, for NYLI Global Equity R&D Leaders Index, the sum of the weights of U.S. companies in the Index (where country is defined by the FTSE All World[®] Growth Index) may not exceed 55% of the Index ("Country Weight Cap"). To the extent sum of the U.S. companies exceed this limitation at the time of the Reconstitution, the Country Weight is applied, and the excess weight is allocated proportionately among the other Index components.

Index Shares

Shares held within the Index are derived from a notional value, the weight as determined above, and component prices as of the Reconstitution.

Index Maintenance

Reconstitution

The Index is reconstituted on a quarterly cycle (the "Reconstitution") and the Index is

adjusted intra-quarter only in connection with certain corporate actions (as described below) or as otherwise provided by this methodology.

Components are selected based upon data available through the third Friday of March, June, September and December. R&D data are checked against prior reported R&D data and against a 3rd party data source for accuracy. Any component' R&D that are deemed to be in violation of the quality control thresholds are researched and, if necessary, reverted back to the primary data vendor for further review. The Reconstitution occurs on the 3rd Friday and becomes effective at the open of the first business day of the next month.

Rebalance

The Index is rebalanced on the same cycle as the Reconstitution.

Corporate Events and Index Policy

Refer to the NYLI Events Guide.

Index Calculation

Index Level

The following general formula is used to calculate the Index Level:

$$\frac{\sum_{i=1}^n (P_i \times \text{Shares}_i)}{D}$$

P_i = Price of security i

Shares_i = Notional Shares of security i

D = Divisor

Return Series

The Index return series is based on the treatment of cash dividends, stock dividends, and spin-offs (collectively determined as a “Distribution”).

- Price Return (PR) versions are calculated without adjustments for Distributions.
- Net Total Return (NTR) versions reinvest regular cash dividends at the close on the ex-date after the deduction of applicable withholding taxes.
- Total Return (TR) versions reinvest regular cash dividends at the close on the ex-date with no deduction of applicable withholding taxes.

In the event there are no regular cash dividends on the ex-date, the daily performance of the indices will be identical.

Currency

The Indexes are calculated in U.S. Dollars.

Base Dates and History Availability

Index	Index Live Date	Return Type	First Live Index Value	Base Date	Base Value
NYLI U.S. Large Cap R&D Leaders Index	November 30, 2021	Price Return	1000	November 30, 2021	1000
		Total Return	1000		
NYLI Global Equity R&D Leaders Index	November 30, 2021	Price Return	1000	November 30, 2021	1000
		Net Total Return	1000		

Ticker

Index levels are available through major quote vendors, numerous investment-oriented websites, and various print and electronic media. New York Life Investment Management LLC's website also provides an archive of recent index announcements.

Index	Return Type	Bloomberg
NYLI U.S. Large Cap R&D Leaders Index	Price Return	IQLCRND
	Net Total Return	IQLCRNDT
NYLI Global Equity R&D Leaders Index	Price Return	IQGLRND
	Net Total Return	IQGLRNDN

APPENDIX 1: Amendment History

Amendment History

Effective Date	Change
November 30, 2021	Effective date for rule book
July 14, 2022	Index rebalance selection date change
November 18, 2022	Add U.S. country constraint information in the reconstitution section
December 12, 2023	IQ U.S. Mid Cap R&D Leaders Index removed due to its termination
August 28, 2024	Effective August 28, 2024, the index management services provided by IndexIQ Advisors LLC (“IndexIQ Advisors”), an indirect, wholly owned subsidiary of New York Life Insurance Company (“NYL”), was transferred to New York Life Investment Management LLC (“NYLIM”), which is also an indirect, wholly owned subsidiary of New York Life Insurance Company (“NYL”). NYLIM replaced IndexIQ LLC as the index provider for all indexes developed and maintained by IndexIQ LLC and, as part of this change, the index names changed respectively to the NYLI U.S. Large Cap R&D Leaders Index and NYLI Global Equity R&D Leaders Index from IQ U.S. Large Cap R&D Leaders Index and IQ Global Equity R&D Leaders Index

APPENDIX 2: Disclaimers

Disclaimers

This document and the information included herein is proprietary to New York Life Investment Management LLC and is protected by copyright and other intellectual property laws. The unauthorized copying, redistribution, sale, retransmission or other transfer to a third party of this data, without the prior written consent of New York Life Investment Management LLC, is strictly prohibited.

Any use or exploitation of this document or the information included herein, for the purpose of creating any financial product or service which seeks to match the performance of the Indexes, or which otherwise is based on the Indexes, is not permitted unless a written license from New York Life Investment Management LLC has been obtained.

It is not possible to invest directly in an index. Exposure to an asset class represented by an index is available through investable instruments based on that index. New York Life Investment Management LLC does not sponsor, endorse, sell, promote or manage any investment fund or other investment vehicle that is offered by third parties and that seeks to provide an investment return based on the performance of any index. New York Life Investment Management LLC makes no assurance that investment products based on the index will accurately track index performance or provide positive investment returns. New York Life Investment Management LLC makes no representation regarding the advisability of investing in any such investment fund or other investment vehicle. A decision to invest in any such investment fund or other investment vehicle should not be made in reliance on any of the statements set forth in this document. Prospective investors are advised to make an investment in any such fund or other vehicle only after carefully considering the risks associated with investing in such funds, as detailed in an offering memorandum or similar document that is prepared by or on behalf of the issuer of the investment fund or other investment product or vehicle. New York Life Investment Management LLC is not a tax advisor. A tax advisor should be consulted to evaluate the impact of any tax-exempt securities on portfolios and the tax consequences of making any particular investment decision. Inclusion of a security within an index is not a recommendation by New York Life Investment Management LLC to buy, sell, or hold such security, nor is it considered to be investment advice. Closing prices for New York Life Investment Management LLC indices are calculated by the Calculation Agent based on the closing price of the individual constituents of the index as set by their primary exchange. Closing prices are received by the Calculation Agent from one of its third-party vendors and verified by comparing them with prices from an alternative vendor. The vendors receive the closing price from the primary exchanges. Real-time intraday prices are calculated similarly without a second verification.
