Returns represent past performance which is no guarantee of future results. Current performance may be lower or higher. Investment return and principal value will fluctuate, and shares, when redeemed, may be worth more or less than their original cost. Performance reflects a contractual fee waiver and/or expense limitation agreement in effect until terminated by the board of Trustees of the ETF, without which total returns may have been lower. Visit www.newyorklifeinvestments.com for the most recent month-end performance. Expenses stated are as of the fund's most recent prospectus.

Shares are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Total Returns are calculated using the daily 4:00 pm ET net asset value (NAV). Since May 31, 2016, the price used to calculate the market price returns ("MP") is the mean between the day's last bid and ask prices on the fund's primary exchange. Any market price returns prior to May 31, 2016 were calculated using the day's closing price on the fund's primary exchange. The market price returns do not represent returns an investor would receive if shares were traded at other times. Index performance is for illustrative purposes only and does not represent actual Fund performance. One cannot invest directly in an index. Performance data for the Index assumes reinvestment of dividends and is net of the management fees for the Index's components, as applicable, but it does not reflect management fees, transaction costs or other expenses that you would pay if you invested in the Fund directly. No representation is being made that any investment will achieve performance similar to that shown.

Before You Invest

Before considering an investment in the Fund, you should understand that you could lose money.

About Risk: As with all investments, there are certain risks of investing in the Fund. The Fund's Shares will change in value and you could lose money by investing in the Fund. An investment in companies that invest in **real estate** (including REITs) exposes the Fund to the risks of the real estate market and the risks associated with the ownership of real estate. Real estate is generally a less liquid asset class and companies that hold real estate may not be able to liquidate or modify their holdings quickly in response to changes in economic or other market conditions. Investments in **infrastructure companies** expose the Fund to potential adverse economic, regulatory, political, legal, and other changes affecting such investments. Issuers of securities in infrastructure-related businesses are subject to a variety of factors that may adversely affect their business or operations. Investments in the **securities of non-U.S. issuers** involve risks beyond those associated with investments in U.S. securities. These additional risks include greater market volatility, the availability of less reliable financial information, higher transactional and custody costs, taxation by foreign governments, decreased market liquidity and political instability. Foreign issuers are often subject to less stringent requirements regarding accounting, auditing, financial reporting and record keeping than are U.S. issuers, and therefore not all material information will be available. **Emerging market countries** are subject to greater market volatility, lower trading volume, political and economic instability, uncertainty regarding the existence of trading markets, rapid inflation, possible repatriation of investment income and capital, currency convertibility issues, less uniform accounting standards and more governmental limitations on foreign investment than more developed markets. The fund may consider certain **Environmental, Social and Governance (ESG)** criteria when evaluating an investment opportunity. The application of ESG criteria may result in the Fund having exposure to certain securities or industry sectors that are significantly different than the composition of the Fund's benchmark and performing differently than other funds and strategies in its peer group that do not take into account ESG criteria or the Fund's benchmark. There can be no guarantee that the Fund will meet its investment objective(s). There is no assurance that employing ESG strategies will result in more favorable investment performance.

The MSCI World Index is a free float-adjusted market capitalization-weighted index that is designed to measure the equity market performance of developed markets.

The Blended Benchmark Index consists of the FTSE EPRA Nareit Developed Index and the FTSE Global Core Infrastructure 50/50 Index weighted 50%/50% respectively. The FTSE EPRA Nareit Developed Index is designed to track the performance of listed real estate companies and REITs worldwide. By making the index constituents free-float adjusted, liquidity, size and revenue screened, the series is suitable for use as the basis for investment products, such as derivatives and Exchange Traded Funds (ETFs). The FTSE Global Core Infrastructure 50/50 Index captures the performance of listed infrastructure securities in both developed and emerging markets. Constituents are selected by further screening companies that derive revenues from infrastructure related activities within particular Industry Classification Benchmark (ICB) sub-sectors of the FTSE Global All Cap Index. FTSE applies minimum infrastructure revenue thresholds of 65% for constituents of the Core Infrastructure indices.

Price/Earnings Ratio is a valuation of a company's current share price compared to its per-share earnings and is not intended to demonstrate growth or income. **Price/Book Ratio** is used to compare a company's stock's value to its book value and is not intended to demonstrate growth or income.

Consider the Funds' investment objectives, risks, charges, and expenses carefully before investing. The prospectus and summary prospectus include this and other information about the Funds and are available by visiting the Prospectus. Read the prospectus carefully before investing.

Fund shares are not individually redeemable and will be issued and redeemed at their NAV only through certain authorized broker-dealers in large, specified blocks of shares called "creation units", and otherwise, can be bought and sold only through exchange trading. Creation units are issued and redeemed principally in-kind.
